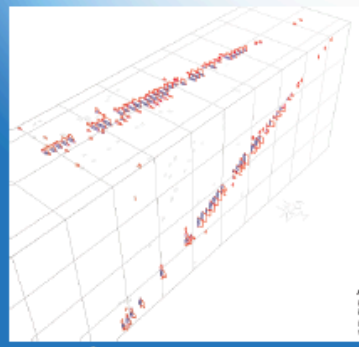
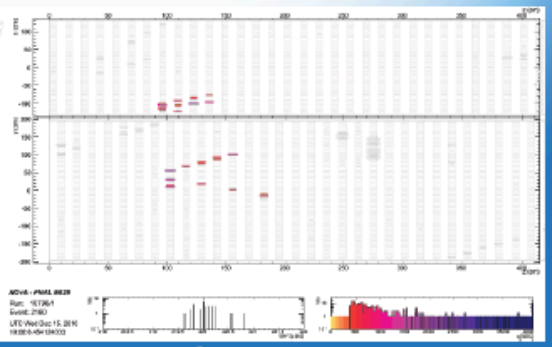
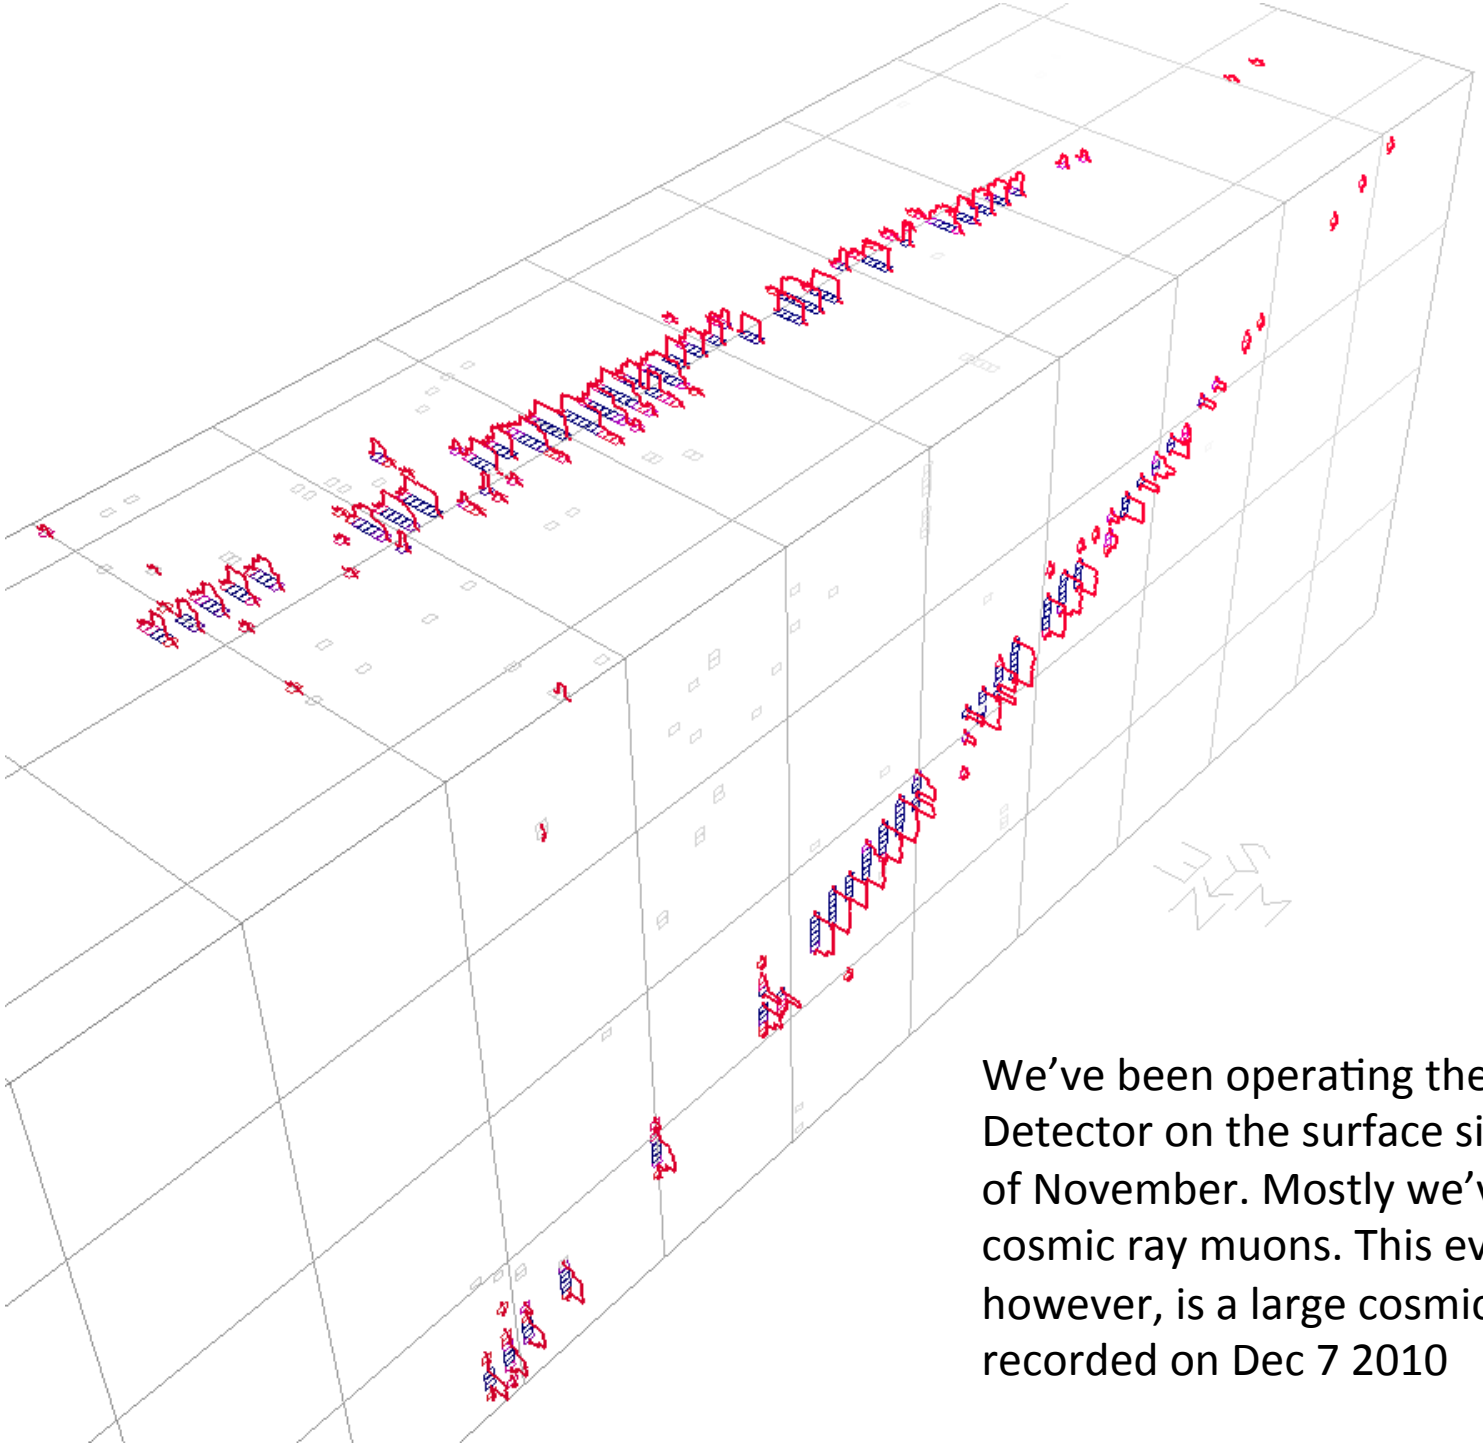
Season's greetings from the NOvA collaboration



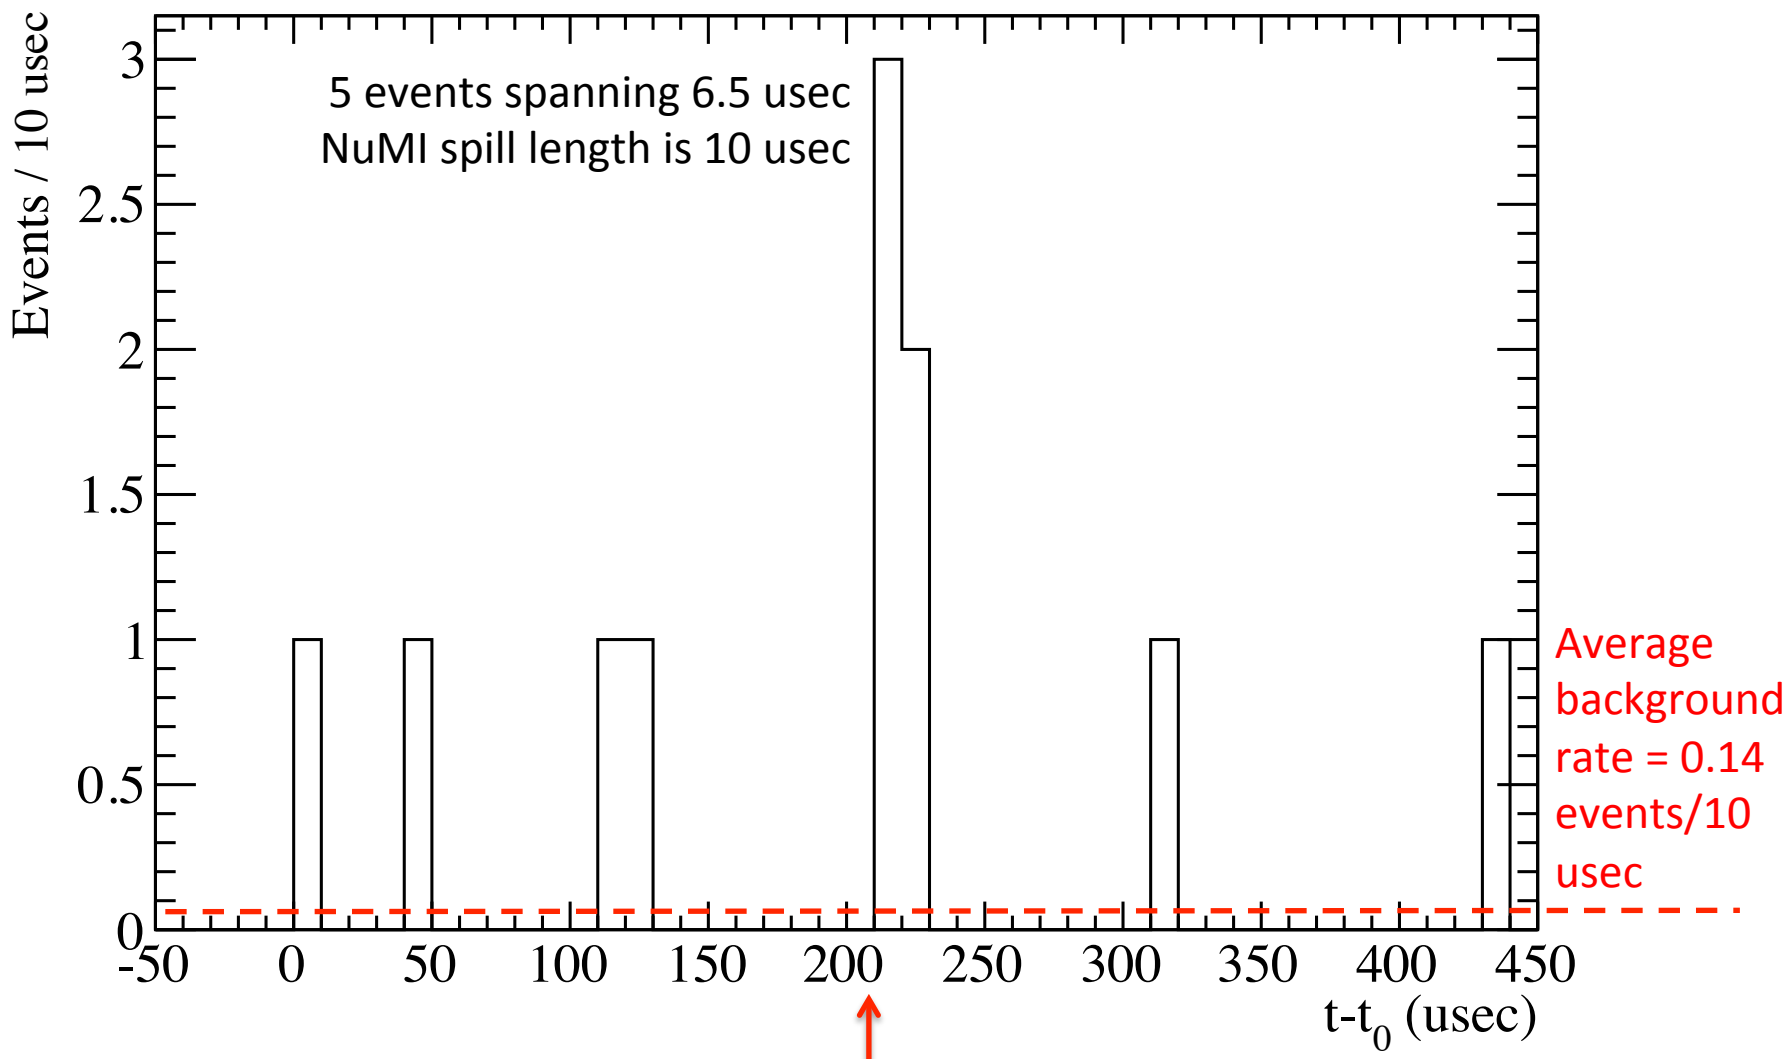
A cosmic ray shower



Our first neutrino

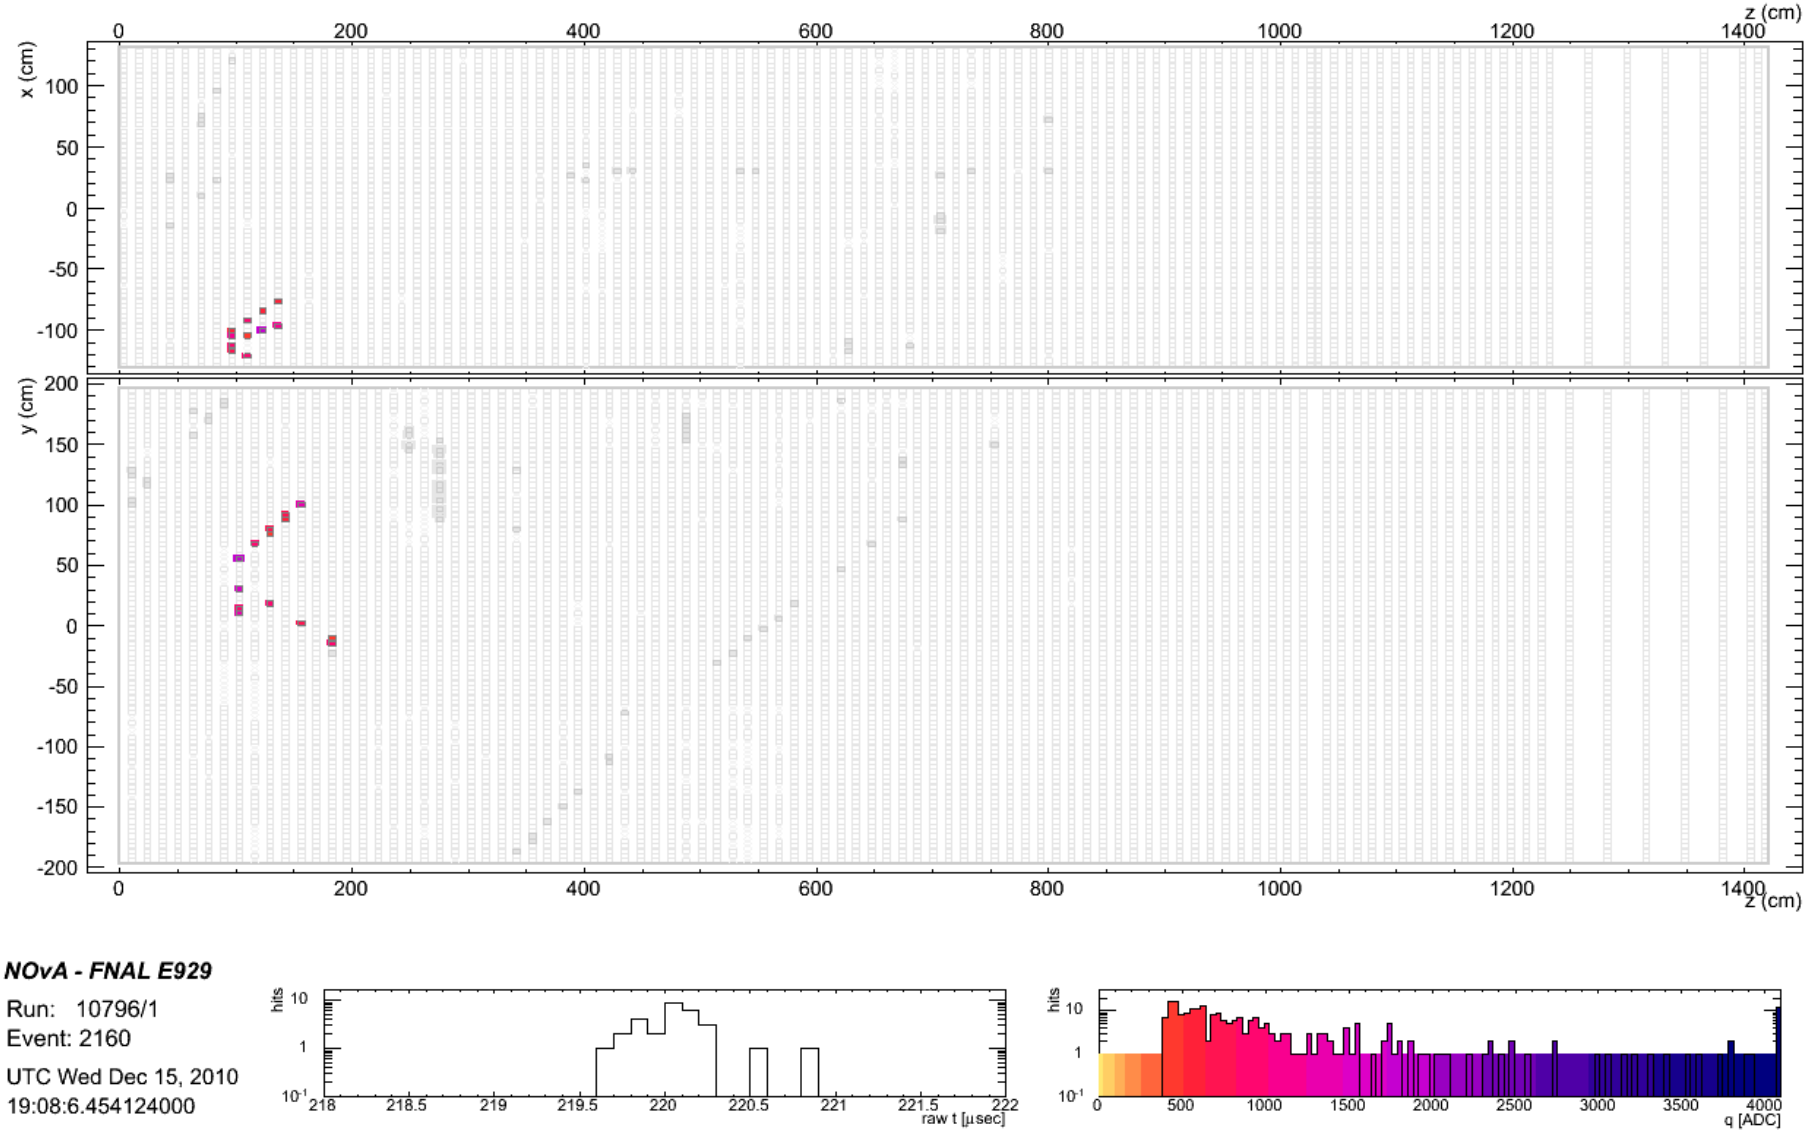


We've been operating the Near Detector on the surface since the end of November. Mostly we've recorded cosmic ray muons. This event, however, is a large cosmic EM shower recorded on Dec 7 2010



"Dead reckoned" earliest possible arrival time of neutrinos from NuMI 208 usec

Recently, we've implemented a trigger for the NuMI spills…



… and seen our first neutrinos!
